Solupak is a UK developer and manufacturer of water-soluble daily cleaning and disinfectant products for commercial, domestic and leisure use across many industries.

Our specialism is water-soluble products using granules which are effectively contained within PVOH films until the point of use. The system is a 4-step process; fill, add, shake and go. The system operates...

- **Without requiring large, expensive dosing systems.**
- **Without relying on operatives dosing correctly.**
- **Without having expensive ready to use products.**
- **Without waste, just add water... and they dissolve.**
- **With the highest possible environmental accreditations.**
- **With the guarantee that the active ingredients are optimally dosed.**
- **With a product for all applications.**

Specialist Products

Acid Clean Descaler

Dilution ratio
Ready to use liquid

A periodic heavy duty descaler for areas where scale build up is an issue. Fast acting and ready to use liquid. Use with care.

Where to use

Beerline Cleaner

Dilution ratio
1 sachet per 10L container

Suitable for use in beerlines, tanks and taps. The powerful solution will loosen and remove any yeast deposits in the lines and is thorough enough to remove any trace elements from your beer dispensing equipment which helps to reduce the risk of bacteria build-up.

Where to use

Limescale Remover

Dilution ratio
1 sachet per 1L bottle

Suitable for use on surfaces to prevent limescale build up.. Perfect for use directly on kettles and shower surfaces.

Where to use

Heavy Duty Degreaser

Dilution ratio
1 sachet per 750ml trigger bottle

A powerful detergent and degreaser formulated for areas of grease build up. Contains strong grease cutting components. Perfect for use on ovens and appliances.

Where to use

Air Freshener

Dilution ratio
1 sachet per 750ml trigger bottle

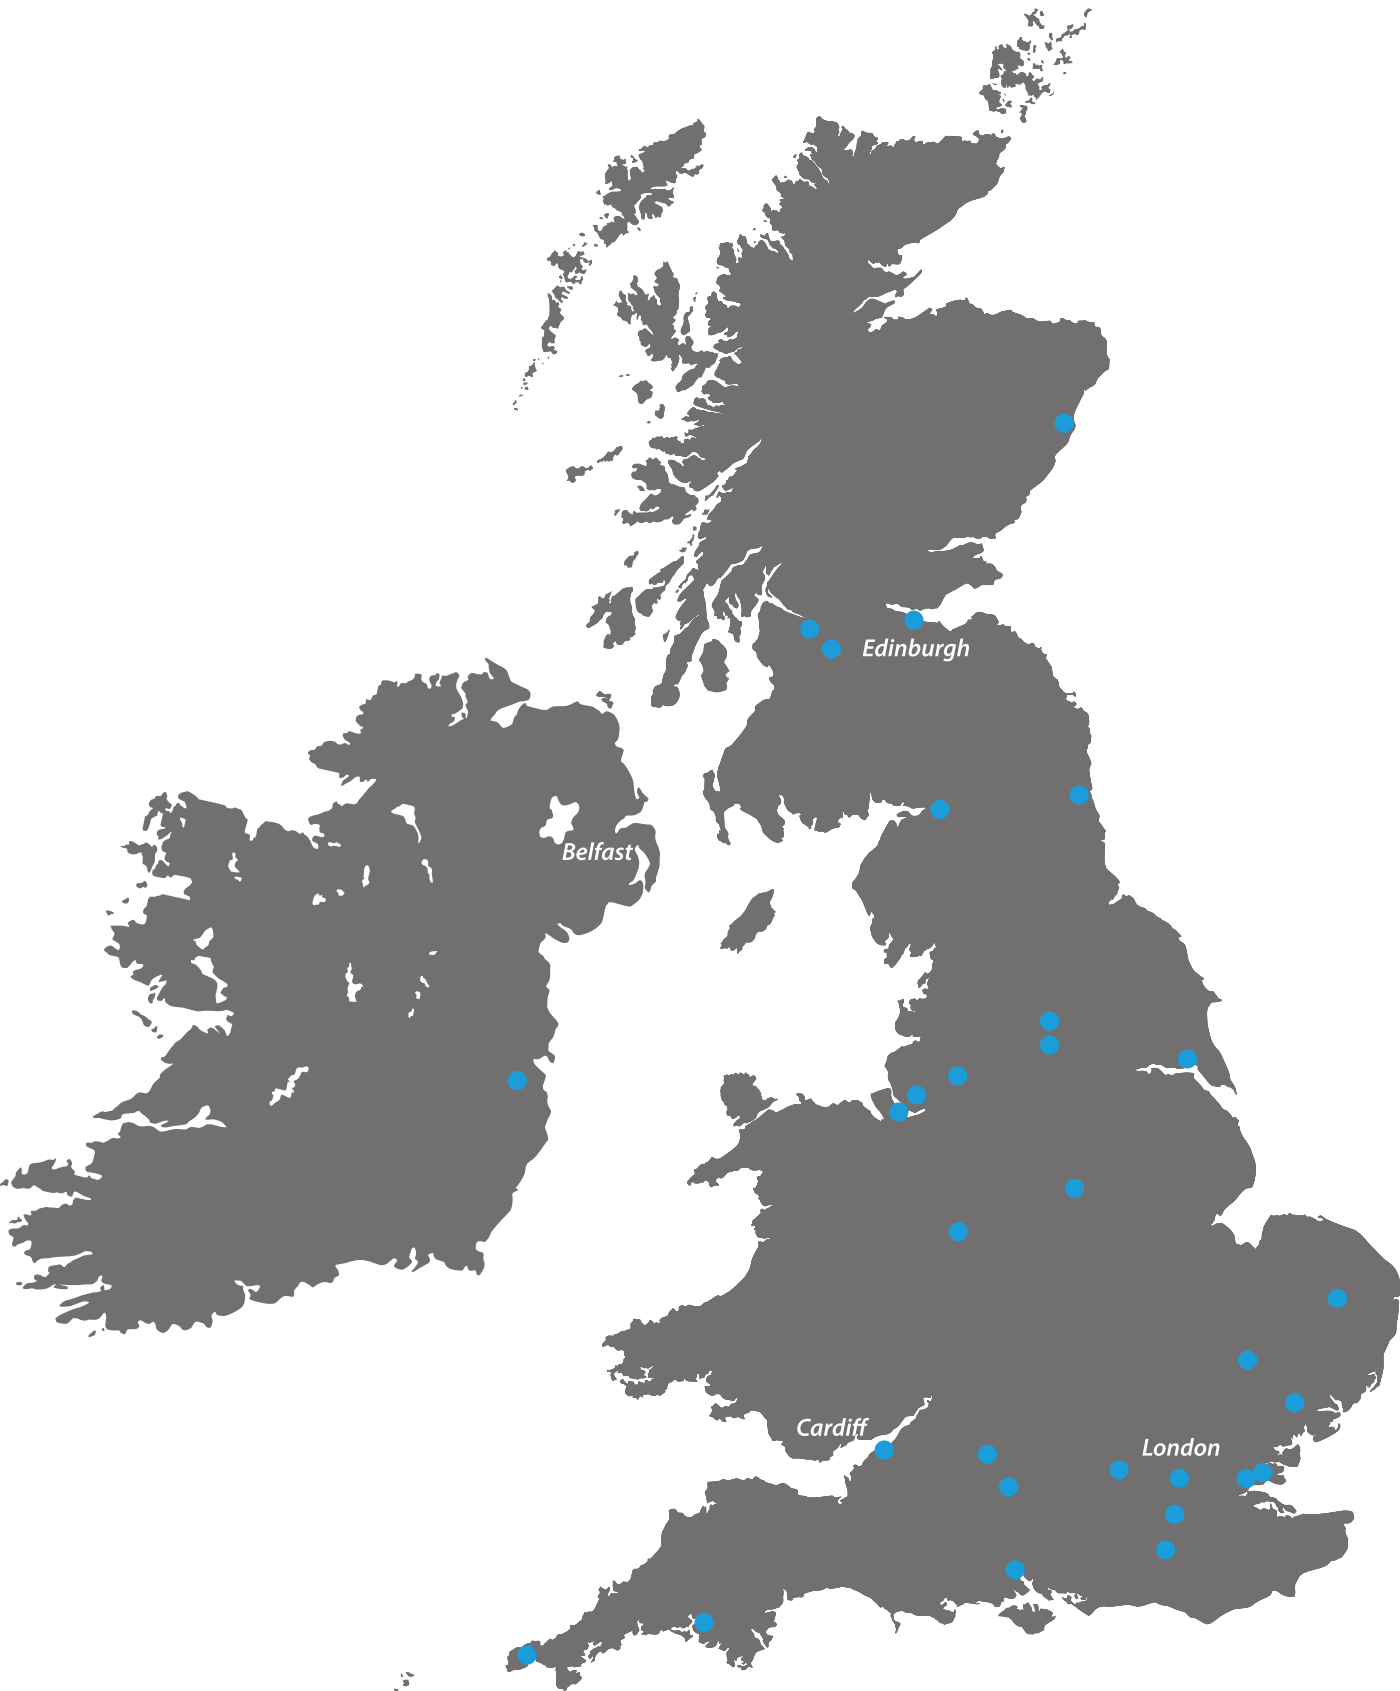

High fragrance air freshener which is very effective in neutralising unpleasant odours.

Keeping it Simple

The products are so easy to use that we provide the instruction in pictures.
The 4-step process is:

1. Fill with water

2. Place the sachet(s) in the empty bottle / bucket / machine or other container

3. Agitate / shake / swirl the water until the sachet is completely dissolved

4. Use

The dissolving sachets colour the water making it immediately obvious where the trigger spray bottle is meant to be used and avoids potential cross contamination.

Sanitary fittings and washroom floors

General food and bar areas

Clinical areas

General low risk areas

Our Trademarked Bottle4Life Bottles are:

- Wide neck so the sachet can be easily placed in the bottle
- Permanently marked with the product label including diagrammatic instructions for use
- Marked to show the correct fill level

Keeping Your Staff Safe

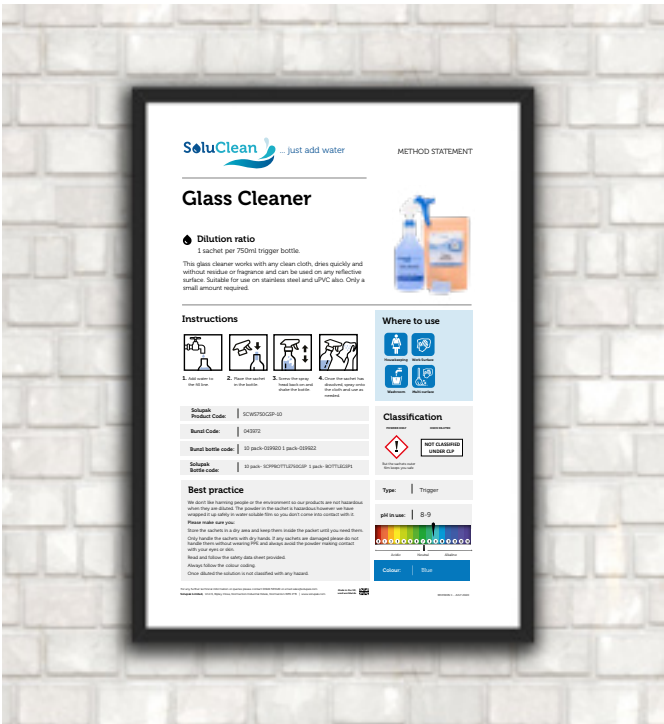

The pictorial guides and bottle labels reinforce this 4-step process, with the addition of colour coding to ensure correct use and to assist users with language and learning barriers. The products are colour coded according to the relevant industry body, so for example, the Soluclean range is coded according to the British Institute of Cleaning Science (BICSc) colour coding, as shown on the previous page.

For please enquiries ring
01924 565120
or email
sales@solupak.com

The dosing is always correct which means that the active ingredients in the sachets will work at the optimum level and costs are fully controlled at site level.

There is minimal risk of the concentrate coming into contact with the user's skin or eyes. No manual handling is involved when using or moving the products before water is added.

Our laminated wallcharts and key fob cards are provided to assist your staff; they provide details of the approved products you are using and can be supplied with your logo displayed.
